JUAN CARLOS

Computer Systems Engineering student.

ABOUT ME

I am a student focused on creating efficient and scalable solutions, using the best technologies and practices for continuous development.

EXPERIENCE

Collaborative Projects with Innovatec

- Contributed to two projects as an Android Developer and Web Developer. In these roles, I was responsible for designing, developing, and implementing solutions that achieved acceptable results, demonstrating my ability to work effectively in a team-oriented environment.

Oracle One 2024 Program

- Participated in the Oracle One 2024 Program, where I specialized in Front-end Development. I gained hands-on experience with tools such as React and SQL, enhancing my technical skills and understanding of modern web development practices.

NASA International Space Apps Challenge 2023

- Engaged in the NASA International Space Apps Challenge 2023, contributing to the front-end development of a project. This experience allowed me to collaborate with diverse teams and tackle real-world challenges using innovative technologies.

EDUCATION

2017-2020

Technical Degree in Computer Support and Maintenance
Conalep 150 Tehuacán

2020- PRESENT

Bachelor's Degree in Computer Systems Engineering
Instituto Tecnológico de Tehuacán

TOOLS

React

Reflex

Android Studio

Sql server/ sql workbench

SUMMARY

Junior Web Developer with a strong foundation in computer systems engineering and hands-on experience in web and mobile application development. Proficient in modern frameworks and languages such as React, React Native, Django, JavaScript, and Python. Demonstrated ability to create responsive web applications and manage databases using technologies like SQL, MongoDB, and Firebase. Passionate about learning and implementing new technologies to deliver innovative solutions.

WORK EXPERIENCE

Frontend Developer – Personal Project: TempoP

- Developed a fully responsive and interactive web application designed to demonstrate time management functionalities.
- Utilized React.js, HTML, and CSS to build a clean and user-friendly interface, ensuring compatibility across devices.
- Incorporated modern JavaScript features for dynamic content rendering and real-time user interaction.
- Deployed the application using Netlify, showcasing proficiency in hosting and deployment platforms.
- Prioritized best practices in UI/UX design, emphasizing user experience and accessibility.

Frontend Development Student – Oracle One Front-End Development Program (2023)

- Built web applications as part of a structured learning program supported by Oracle and Alura.
- Completed real-world projects using React, HTML, and CSS, applying foundational web development principles.
- Gained experience in debugging and testing code to ensure quality and performance.
- Collaborated with peers on group challenges, demonstrating teamwork and effective communication in a remote environment.

EDUCATION

Bachelor's Degree in Computer Systems Engineering

Instituto Tecnológico de Tehuacán – Tehuacán, Puebla, Mexico

2020- 2024
(Expected Graduation)

- Currently in the final semester of the program.
- Gained expertise in software development, database management, and programming languages, including SQL, Python, Java, JavaScript, C++, and C#.
- Participated in academic projects that applied theoretical concepts to real-world problems, strengthening problem-solving and technical skills.

KEY SKILLS

- Problem Solving.
- Communication.
- Time Management.
- Adaptability.
- Teamwork.
- Attention to Detail.
- Self-Learning.
- Creativity.
